Looks like the PowerPoint bounced back from EPA and HDR due to file size, so I attached a PDF version.

Scott, did you receive the PowerPoint I sent?

Hi Jen,

We can keep this RM 10.9 presentation in our back pocket. It's got some good information about cap layers, sample locations, sample deployment attempts, and has some of the pictures of the bent samplers.

Let me know if this works for you,  
Keegan

Hey guys –

Thank you for getting the revised powerpoint over to us. I've made some edits and am at a loss as to how I can transfer this over to you as a .ppt.

In the meantime, I've saved it as a pdf to so that you can help me with the some notes and specific questions I have on slides:

Slide 1 – I'm going to look around tomorrow afternoon to see if I can find a nice photo for the presentation. Let me know if anything comes to mind.

Slide 2 – Can each presenter give me an estimate of how long they think they will need to cover their slides? I will use that then to build in pre-defined breaks.

Slide 5 – Can someone pull me the DDT timeframe.

Slide 35 – “reworking” in the last bullet is throwing me off. I don’t think it is clear what you’re trying to say

Slides 36 to 42 – Chuck and Marian are working on revising these

Slide 56 – Looking to confirm someone is putting together a summary slide

Slide 57 – Who is presenting this one?

Slides 62, 63, 64 – I’m struggling with these slide titles . They aren’t clear and repeat words.

Slide 69 – Looking to confirm someone is putting together a summary slide.

Slide 70 – Just a heads up, I got rid of iterative approach here and added an introduction to the FS topics (Aaron)

Slide 80– Can we clarify in title whether it’s CPG’s or EPA’s evaluation.

Slide 81 – Can you please revise title to clarify if this is CPG’s presentation or EPA’s

Backup slides – Keegan – can you throw in a couple of the SPME sampling pics – Maybe some of the bent ones in case we get questions about our experience with that.
